Division 26 Electrical
Medium Voltage Transformers

26.13
Windings:
• High and low voltage windings shall be wound using copper conductors.

Fluid-Filler Pad-Mounted Transformers:
• The transformer shall be compartment type, self-cooled, tamperproof and weatherproof for mounting on a pad.
• Dual Feed and selector switch on the line side.
• Primary voltage 12.47kV delta.

Transformer Pad:
• Provide a precast concrete slab box/vault for padmount transformer.
