

# Facilities Management T-2000

## Project Description

This newly refurbished building is being occupied by our Sustainability and GEOSYS departments. This building was demoed down to the studs. We then proceeded to build new walls to accommodate the needs of staff as well as the needs of each department occupying the building. A brand new state of the art conference room was built for use not only for facilities but for other departments on campus as well. This building was built to comply with all ADA guidelines and also for LEED certifications.
